about page links	Done		DIT 2-1 Roche, Maui Jane S.	
about page design	Done		DIT 2-1 Roche, Maui Jane S.	
+ New sub-item				
▼ Deployment	Done			
deploy to hosting (simulation)	Done		DIT 2-1 Añonuevo, Jheferson	

We were able to add a view webpage and feature so that the user can view their entries.

Nogadas, Von Ryan - created the view_journal.php

Cahigan, Mark louie – uploaded the database to github, designed the view_journal.php and added the hyperlinks to other webpages.

Donatos, Andrea – She was able to start on the design of the add journal.

Añonuevo, Jheferson – added a favicon to the webpages, redesigned the header and footer.

Roche, Maui Jane – She was able to design the about page and login page and the homepage.

Retrospective Report

What went well – We were able to add and design each webpages as well as fix minor issues. We are able to add a favicon and add a new web page that includes a view feature. We also added the files to our hosting provider so that we could fix issues early on when it comes to our deployment.

What could be improved – We could improve on the functionality of each buttons and methods. We also need to beta test the website to check for further debugging.

What needs to be done – We need to start creating javascript functions for each webpages. We need to add the theme customization, buttons, dynamic alerts, etc.. We also need to start making our website mobile responsive.
